## **StoneRidge Corporation's Bryce Roberts Presenting "Java Methods to Improve Velocity Scripts" at 2012 Cascade User Conference**

**ATLANTA, GA** – StoneRidge Corporation, a premium provider of enterprise technology solutions, has announced that Bryce Roberts, a senior software engineer with the company, will be presenting a session at Hannon Hill's 7<sup>th</sup> Annual User Conference, scheduled for September 16-18, 2012 at Georgia Tech's Global Learning Center in Atlanta.

Roberts will deliver his session, "Using Java Methods to Improve Velocity Scripts", on Monday, September 17 at 4:15pm. During the presentation, he will discuss how Velocity users have access to the methods of the underlying Java classes for each Velocity variable. These classes provide the developer with ways to accomplish goals which otherwise would be extremely difficult, if not impossible, to achieve programmatically. Learning objectives for Roberts' presentation are (1) understanding how to "call" methods with a Velocity variable; (2) making a macro to invoke a method while ignoring its return; (3) programmatically adding Google Analytics tracking code to WYSIWIG content; and (4) programmatically calculating a color schema based on user input.

Roberts, a senior software engineer at StoneRidge Corporation, holds a Masters of Science in Public Health from the University of Alabama at Birmingham and a Masters of Science in Pharmaceutical Science from the University of Florida. He is involved in numerous ongoing projects ranging from developing responsive designs to custom data tracking applications. Past development projects include custom web-based committee management applications, data collection tools for higher education accreditation, and statistical modeling for pharmaceutical trials. In addition to software development, Roberts has authored scholarly articles on topics including the treatment of FGIDs with SSRIs, 'recovery' from autism, and teacher education.

Visit Hannon Hill's website to [register or learn more about this year's Cascade User Conference](#).

### **About StoneRidge Corporation**

Headquartered in Marietta, Georgia, StoneRidge Corporation is a leading provider of enterprise class technology services and support for businesses of all sizes in several different industries. The StoneRidge team works closely with their customers to design and implement the best solutions for custom business applications, website development and analytical services, as well as their network and virtual server environment needs. For more information, visit [www.StoneRidge.net](http://www.StoneRidge.net) or call 770-509-0022.
